with remarkable sizes

permanent, shapely reusable
packaging, instead of complicated
one-way packaging

high-quality contents
well-organized and
protected

case solutions for your success.

BEAT

In-mould labeling provides optimum product presentation in brilliant photo quality

As a reusable packaging, BEAT offers a **professional product presentation** due to the optional sealing as well as euro hole hangers.

The idea behind BEAT . . .

To pack bit sets, hand tools, but also promotional items is in a class of its own. The packaging should be easy to open, protect the contents safely during transports and it should also look good. The case line BEAT combines all these requirements in just one single packaging solution.

In addition to a secure protective packaging, BEAT also offers the possibility of a uniform design of the case surfaces by using the in-mold labeling. In combination with a customized label in photo quality, you can also upgrade the contents of the case.

Because of the optional euro hole hangers, BEAT can be attached to all standard shelf systems. This guarantees a remarkable product presentation at the eye level with your customers – directly at the point of sale.

Whenever conventional packaging will not meet the requirements due to their inappropriate formats, you will always find the suitable case solutions for your application out of over 30 different sizes of the BEAT case line!

instead of complicated one-way packaging, BEAT is reusable and easy to open.

optional with euro hole hangers

a colour-combined case with a transparent cover makes contents visible

The sizes of the case line BEAT set new standards to pack your high quality products!

Sensitive measuring devices and optical products are dependent on a secure and high-quality packaging. The case line BEAT combines a robust construction with a remarkable technical design. The recessed handle of BEAT is comfortable to hold and allows a safe handling during mobile uses.

In contrast to many conventional case packaging, the slim sizes of BEAT are especially efficient as a packaging for elongated test, measurement and analysis devices. High quality products cannot be lost in the BEAT case. This enables a clear arrangement.

Whether as a practical transport case, or for the protection of sensitive products - the case line BEAT is the ideal packaging solution for any types of applications.

NEW BEAT - in the maxi letter format

- standard-size-oriented case size for a cost- and postage-optimized sending of slim products
- permanent reusable packaging
- attractive advertising medium, which will already be noticed in the **daily mail**
- in contrast to conventional envelopes, BEAT protects the contents against dust, dirt and splashing water
- a packaging that is always **ready for sending**

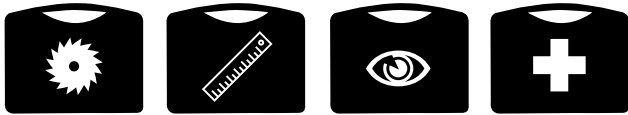

In-mould labeling - the breathtaking colour decoration

- Images and information can be placed with a brilliant photo quality directly on the plastic cases by using the in-mould process.
- The case production and labeling happen in just one step.
- The in-mould labels (decoration labels) consist of the plastic PP, just like the case itself. The label merges with the case during the injection moulding process. A wanton or unintentional remove of labels is not possible - the high quality optic remains.
- The value of the contents can ideally be communicated by the label of the case. Above all, marketing strategies

can optimal be targeted for presentations at the POS.

Out of our range

JAZZ
A simple elegance with the form and a perfect and individual organization of the interior design because of optional dividers or customized foam inlays.

TEKNO
Timeless and classic design, but very versatile in the applications.

HEAVY
Robust sandwich frame construction meets attractive case design. HEAVY is also ideal as a case for heavy loads or as a tool case. Optionally available with divider.

DESIGN OPTIONS
Individual foam or thermoformed inlays guarantee a maximum protection of the contents. Match the colour of the cases, locks and handles to your corporate identity. We can also place your logo on the case shells with a high advertising effect through screen or pad printing.

We consider packaging as a complete case solutions.

We offer industry specific case solutions for

- tools
- measurement technology
- medical technology
- promotion
